

# BAL<sup>®</sup> SJ-1 & SJ-2 MOTORHOME LEVELING SYSTEM

FRONT JACK SYSTEM  
EXTENDED AND  
RETRACTED POSITIONS

**BAL<sup>®</sup>**  
RV PRODUCTS GROUP

## THE PATENTED BAL SJ SYSTEM

• **PROVIDES MAXIMUM LEVELING AND STABILITY FOR MOTORHOMES**, by permanently installing the jacks- front and rear. Total system capacity is 15,000 lbs. (5000 lbs/jack leg).

• **FILLS THE GAP** between inexpensive stack jacks and high cost electro-mechanical or electro-hydraulic systems.

• **EASY TO INSTALL** with the Unibracket universal mounting bracket design. While the SJ System is sold as a dealer installed option, end users with the proper tools and basic mechanical aptitude can successfully complete the installation.

• **EASY AND QUICK TO OPERATE** The manually activated drive screw requires minimum time and effort to level and stabilize the RV.

## SJ-1 & SJ-2 SELECTION CHART

	FRONT	REAR
